

WXair 100-230V (AUS / CN)

Item No: T0053452599
2-Channel-Rework-Module 70 W

The Weller WXair is an optimized, self-contained 2-in-1 rework module with 2 channels: vacuum and air. When used together with the WXsmart soldering station, it transforms into an all-in-one rework solution by consolidating all rework applications into one station. Both the vacuum and the air channels can be operated independently from an external air pressure supply, thanks to the integrated high performance rotary vane pump. The Weller WXair is compatible with two high-power desoldering irons and one hot air iron. The WXair module is also backwards compatible to our existing WX Soldering Platform, providing full flexibility. With WXair, every existing Weller WX soldering station turns easily into a hot air and desoldering station. Designed for both applications either vacuum or hot air.

KEY FEATURES

- WXair upgrades a WXsmart Soldering station to a full All-in-One Rework Station
- World’s First Self-Contained, 2-in-1 Rework Module with integrated high performance rotary vane pump
- More Space on Your Workbench
- Exchangeable filters extend the life time of the pump
- Backwards compatibility for maximum flexibility
- Fast and Easy Station Set-up
- Optional Foot Switch Activation for a Smooth Workflow
- Tool Compatibility: Weller Weller WXDP120 Desoldering Iron (120 W for horizontal use); Weller WXDV120 Desoldering Iron (120 W for vertical use); Weller WXHAP200 Hot Air Iron (200 W)
- ESD Safe

TECHNICAL DATA

Dimensions L x W x H	7.68 x 6.066 x 3.43 In 195 x 154 x 87 mm
Fuse	T4A
Power	70 W
Traceability	Yes
UPC	4003019444601
Vacuum	70 kPA
Voltage	100-240 VAC (50/60 Hz)
Works With	WX, WXsmart
Product Family	WXS Line Soldering Stations
