

WSW SC M1 0,5mm, 500g, SN0,7CU3,5%

Item No: T0051387699
SC M1 Solder Wire, Ø 0,5mm, 500g

Designed to enhance the quality of all your soldering jobs, Weller‘s WSW line of solder increases productivity, and optimizes your soldering performance. The reduced splash feature increases safety and enables you to have a cleaner work area. With a guaranteed 100% continuous flux core, combined with pure first metal melting, WSW enables long-term, highly durable solder joints without cracking, even on difficult surfaces.

KEY FEATURES

- Diameter: 0.5 mm / 0.020 inch, Weight: 500 g / 17.637 oz
- Alloy Sn99.3Cu0.7, Flux content 3.5%
- Silver free alloy = cost effective
- Guaranteed 100% continuous flux core
- Reduced Fe leaching to increase tip life time and reduce tip consumption by up to 70%.
- Very fast wetting even on difficult surfaces, as dirty and oxidized materials
- Applicable on dirty and oxidized materials
- High soldering temperatures possible
- Excellent melting properties
- Reduced splash of flux & No-Clean flux

TECHNICAL DATA

Length	2.4 in
Dimensions L x W x H	63.0 x 65.0mm
RoHS Compliant	Yes
Solder Wire Ø	0.5mm
Temperature Range (Depends on Tool)	227°C
UPC	037103352040
Weight (Catalog)	0.50 kg
Product Family	WSW Soldering Wire
