

Magna-Lite Butane Soldering Iron

Item No: ML500MP

The ML500MP on a medium setting has a working time of approximately 30 minutes, it has the capacity to complete multiple jobs between refills, making it perfect for field service repair applications. And with continuously variable temperature adjustment from 750°F to 900°F it has the versatility to handle anything from basic home electrical projects to intricate tasks involving sensitive electronics. The ML500MP can also be used as a mini-torch when the soldering tip is removed.
