

PT P7

Item No: PTP7

PT S8 Soldering Tip Round Long
425°C, 0,8 mm for TCPS, TCP 12, TCP
24, TCP 42 and FE 50M Soldering Iron,
Width A : 0,8 mm

The Weller Magnastat system operates through a ferro-magnetic sensing device which changes its characteristics when specific temperatures are reached. This causes it to either attract or repel a permanent magnet which operates a power supply switch. In this way power to the heating element can be quickly switched on or off to either provide extra power for soldering operations or reduce power when idling. Various pre-selected tip temperatures are available to permit different types of soldering to be undertaken. Working temperature selection is achieved by simply changing the "temperature sensing" soldering tip. These are available in temperature ratings of 260°C, 310°C, 370°C, 425°C and 480°C.

KEY FEATURES

- + Solid copper, plated with iron all over
- + Nickel and chromium behind the working surface
- + Designed to provide maximum heat transfer from the heater to the tip
- + Individually bagged
- + Tinned with lead-free solder
- + Use only genuine Weller tips

TECHNICAL DATA

Length	44mm
Quantity Per Package	1
Temperature Range (Depends on Tool)	425°C
Tip Shape	Conical
UPC	037103473370
Product Family	PT Soldering Tips
