

PT8-LT

Item No: T0058720788N PT6-LT-adapter with barell 425°C

The Weller Magnastat system operates through a ferro-magnetic sensing device which changes its characteristics when specific temperatures are reached. This causes it to either attract or repel a permanent magnet which operates a power supply switch. In this way power to the heating element can be quickly switched on or off to either provide extra power for soldering operations or reduce power when idling. Various pre-selected tip temperatures are available to permit different types of soldering to be undertaken. Working temperature selection is achieved by simply changing the ";temperature sensing"; soldering tip. These are available in temperature ratings of 260°C, 310°C, 370°C, 425°C and 480°C.

KEY FEATURES

- Soldering tips of LT soldering tip series are used with an adapter in soldering irons TCPS, TCP 12 and TCP 24
- All TCP and LR 21 soldering irons are delivered with the adapter

TECHNICAL DATA

Quantity Per Package	1
Temperature Range (Depends on Tool)	425°C
UPC	4003019063789
Product Family	PT Soldering Tips
