

# Powering 2 tools at once, the **WT 2M** soldering station.

## High flexibility for versatile applications - Soldering tools for **WT**

Powering 2 tools at once and packing 150 W, the multi-functional, 2-channel WT 2M is backwards compatible with Weller's microsoldering cartridge tip tools, plus many other existing passive tip tools.

### Microsoldering pencil and Microdesoldering tweezers

Features twin parallel adjustable tiptlets which allow the soldering and desoldering of very small SMD components.  
Extremely short heat-up time (2–6 seconds)  
Optimum heat transfer  
Minimized recovery time  
Quick, easy tip change  
Providing highest performance

### Hybrid pencil WTP 90

- > High performance, 90 W hybrid soldering pencil
- > Combination between Micro-pencil for highest performance with best heat transfer and passive tip pencils with very good heat transfer while controlling costs.
- > Quick tip change system similar to active cartridge system
- > Automatic standby mode operates from a sensor in the handle which detects when the device is in use

### Passive tip tools

Supporting a wide range of tools using standard passive tips (combined tool power up to 200 W)  
Best in class portfolio to get the right tool for your application  
Providing high performance while controlling the costs
