

WFV 60A

Item No: T0058762746N

Easy-Click WFV 60 A Automatic valve,
including 2 bench mounting brackets,
WX soldering station controlled
automatic valve, male / male

KEY FEATURES

- + An automatic valve that opens when the user picks up the soldering iron
- + Valve closes as soon as it senses the soldering iron is switched off or is entering into sleep mode.
- + Multiple valves can be used with multiple soldering stations (and also preheaters) in a network all connected to a Zero Smog fume extraction unit.
- + The fume extractor will automatically adjust its suction speed depending on how many valves are in the open position, thus optimising filter life and energy consumption.
- + Each valve in a network can be individually pre-adjusted to balance the entire system giving equal suction through each valve irrespective of pipe length and other system losses.

TECHNICAL DATA

Length	5.7 in
Dimensions L x W x H	145.0 x 110.0 x 210.0mm
Compatible Nozzle	WX
Fuse	12 V 500 mA
Power	4 W
UPC	037103366207
Weight (Catalog)	1.20 kg
Product Family	Volume Extraction Accessories
